Title	Therma Facilities Tour
Info	<p>What is SMACNA's mission in the building industry, especially in the Bay Area? What kind of services can the local SMACNA chapter bring, to both their members and those who reference SMACNA standards? Therma will provide a tour of their facility.</p> <p>Similar program/tour can be done with local SMACNA organization and local mechanical subcontractor's facilities.</p>
Date	May 4, 2006
Speaker	Gary Schwenk
Speaker's Address	SMACNA Bay Area Chapter Vice President
Speaker's Telephone	(510) 635-8213
Speaker's E-mail	gschwenk@BayAreaSMACNA.org
Chapter/Contact	Santa Clara Valley – Hannah Moyer (650) 298-8150 hmoyer@watrydesign.com

Title	Under Floor Air Delivery
Info	<p>Underfloor air delivery (UFAD) systems are quickly becoming the system of choice for many basic building types. For engineers, the growing acceptance of UFAD systems is similar to the air conditioning revolution of the 1960's, when variable air volume systems displace the more common constant volume systems. However, with the UFAD revolution, all design and construction team members are challenged to learn how to apply the new technology to make it affordable, constructible, and operate correctly. Architects, consultants, and contractors must all modify their methods to properly design, install, and commission UFAD systems.</p>
Date	April 1, 2004
Speaker	Steven Guttman, PE, LEED, AP
Speaker's Telephone	(415) 625-0730
Speaker's E-mail	steven@gb-eng.com
Chapter/Contact	Santa Clara Valley – Krista Nelson (408) 298-1885 krista@aba-arch.com
